

Section 1 — Introduction

Product Sales & Profitability Analysis

Sales Performance Dashboard Insights

Table of Content

- **Objective**
- **Sales Performance & Trends**
- **Store & Regional Analysis**
- **Customer Insights**
- **Strategic Recommendations**
- **Conclusion**

Objective & Scope

- **Objective:**

To analyze product sales, profitability, customer demographics, and store performance to derive actionable insights and recommend strategies for business growth.

- **Scope:**

Evaluate overall sales and profit trends.

Analyze top-performing and underperforming products.

Study customer purchasing behavior.

Assess store & regional performance.

Provide strategic recommendations for improving revenue and profitability .

Section 2 — Sales Performance & Trends

Overall Sales & Profit Trends

565K

Total Sales

337K

Total Profit

Sales Trend Over Time

- Total Sales = \$565K, Profit = \$337K
- Q4 leads with highest sales \$153K and profit \$91K
- December records peak monthly performance
- Steady sales growth observed towards year-end

Top 5 Products by Sales

Top 5 Products as per Total Sales

- **Hermanos Green Pepper dominates with the highest total sales (923), showing the strong demand.**
- **Just Right Rice Soup (854) and Urban Small Eggs (845) are also high-volume sellers.**
- **Washington Apple Drink (835) and Carlson Head Cheese (822) maintain steady sales performance.**
- **High sales volume of these products indicates customer preference and strong market demand.**

Top 5 Products by Total Profit

- Hermanos Green Pepper again tops the list with the highest total profit (619), showing both strong demand and profitability.
- Special Wheat Puffs (513) and Imagine Waffles (510) contribute moderately to profit.
- National Egg Substitute (501) and Gauss Monthly Sports Magazine (494) round out the top five.
- While some of these may not have the highest margins, their sales volume drives strong total profits.

Top 5 Products by Profit Margin %

Top 5 Products as per Profit Margin %

- Landslide Sesame Oil leads with the highest profit margin at 0.71, indicating strong profitability.
- Club Chocolate Milk, High Quality Glass Cleaner, Skinner Cream Soda, and Sunset Scented Tissue follow closely with margins of 0.70 each.
- These products have consistently high margins, making them significant contributors to profitability despite their sales volumes.
- Focusing on these items can enhance overall profitability strategies.

Top 10 High-Margin Products Table

- The highest-margin products have profit margins between 2.34% and 2.41%.
- Landslide Sesame Oil leads with the highest margin (2.41%), followed by Sunset Scented Tissue (2.36%) and Skinner Cream Soda (2.35%).
- These products achieve better profitability despite having relatively lower retail prices.
- This indicates that focusing on these products can help maximize overall profitability.

Product Name	Retail Price	Product Cost	Unit Profit	Profit Margin %
Landslide Sesame Oil	0.58	0.17	0.41	2.41
Sunset Scented Tissue	1.78	0.53	1.25	2.36
Skinner Cream Soda	1.71	0.51	1.2	2.35
High Quality Glass Cleaner	1.91	0.57	1.34	2.35
Club Chocolate Milk	2.31	0.69	1.62	2.35
Carrington Frozen Pancakes	1.84	0.55	1.29	2.35
Monarch Thai Rice	3.11	0.93	2.18	2.34
Imagine Popsicles	3.81	1.14	2.67	2.34
American Turkey Hot Dogs	2.74	0.82	1.92	2.34
Club Head Cheese	1.47	0.44	1.03	2.340

Are Low-Cost Products Driving Higher Revenue?

- Mid-Low priced products (\$0.51–\$1.00) contribute the highest revenue of \$224K, making them the top driver of sales.
- Mid-High priced products (\$1.01–\$1.50) follow closely with \$216K, showing strong performance as well.
- High-cost products (>\$1.50) generate only \$72K, despite having higher unit prices, indicating lower demand.
- Low-cost products ($\leq$ \$0.50) contribute the least revenue at \$54K, meaning ultra-low prices don't necessarily drive sales volume.

Section 3 — Store & Regional Analysis

Top & Bottom Stores Performance

- **Top Performers:** Store 13 and 17 lead in both sales and profit, driving overall performance.
- **Mid Performers:** Stores 11, 7, 24, 3, 15, 16, and 6 contribute moderately to revenue.
- **Underperformers:** Stores 23, 2, 22, and 14 show low sales and minimal profits, requiring improvement strategies.

District Contribution Analysis

Top Districts:

- Los Angeles, Salem, and Tacoma drive the highest sales, making them key revenue contributors.

Profit Trend:

- Total profit decreases consistently as total sales decline, showing a direct link between sales and profitability.

Low-Contribution Districts:

- Bellingham, Walla Walla, and San Francisco generate the lowest sales and profits.

Store Type Performance

- **Supermarkets lead with \$319K sales (56.47%) and \$190K profit.**
- **Deluxe Supermarkets rank 2nd with \$162K sales (28.67%) and \$96.6K profit.**
- **Gourmet Supermarkets contribute \$45.7K sales (8.09%) and have the highest avg. spend (\$6.71).**
- **Mid-Size Groceries show \$24.3K sales (4.3%) with moderate profits.**
- **Small Groceries underperform with \$13.8K sales (2.46%) and lowest profit (\$8.3K).**

Store Type	Total Sales	Total Profit	Avg Spend / Txn
Supermarket	319,210.04	190,365.58	6.68
Deluxe Supermarket	162,062.24	96,668.46	6.61
Gourmet Supermarket	45,750.24	27,291.82	6.71
Mid-Size Grocery	24,329.23	14,494.42	6.66
Small Grocery	13,886.38	8,305.2	3.43

Section 4 — Customer Insights

Top 20 High-Value Customers - Demographic Profile

1. Gender Distribution

- High-value customers are slightly female-dominant.

2. Marital Status

- Single customers form the largest contributor group.

3. Education Level

- High-value customers are mostly Partial High School & High-School educated.

High Value Customer Count

Impact of Gender on Purchasing

Customer Count:

Almost equal, but slightly more male customers.

Average Purchase Value:

Females spend slightly more per transaction despite having a slightly lower count.

- **Marketing campaigns targeting female shoppers could generate higher returns.**

Customer Count

Avg Purchase Value

Impact of Marital Status on Purchasing

Transaction Count:

Almost equal, but singles make slightly more purchases.

Average Spend:

Married customers have a marginally higher average spend.

Insight:

- Singles contribute slightly more to sales volume.
- Married customers contribute slightly more to value per purchase.

Transaction Count

Average Spend

Impact of Education on Purchasing

Purchasing at Education Level

Insight :

- Customers with a High School Degree and Partial College education have the highest average spending.
- Graduate degree holders spend the least per transaction, possibly indicating more price-conscious behavior.

Member Card Distribution & Performance

- **Bronze card dominates with 55.47% customers, generating the highest revenue (\$313K).**
- **Normal cards contribute 23.54% customers and \$132.7K sales.**
- **Golden and Silver have fewer holders but higher avg. spend per customer (~\$60 for Golden).**

Member Card Holder Performance

Member Card	Total Sales	Avg Spend / Txn	Avg Txn / Customer	Customer Count	Txn Count	Avg Sales / Customer
Silver	47,137.45	6.5	8	960	7,252	49.10
Golden	72,199.65	6.69	9	1,198	10,789	60.27
Normal	132,721.46	6.47	8	2,420	20,501	54.84
Bronze	313,179.57	6.48	8	5,703	48,295	54.91

Strategic Recommendations

Recommendations

- **Product Strategy**

Focus on high-margin products and expand their availability across top-performing stores.

Introduce competitive pricing strategies for low-cost, high-revenue products to maximize sales.

- **Customer Strategy**

Design targeted marketing campaigns for high-value customer segments based on gender, education, and marital status trends.

Focus on upselling to Bronze & Normal card holders to increase their spending.

Introduce loyalty benefits for Golden members to retain high-value customers.

Create special promotional campaigns targeting Silver card holders to improve engagement.

- **Store Strategy**

Prioritize Supermarkets and Deluxe Supermarkets for inventory allocation due to higher sales contribution.

Improve Small Grocery performance by offering discounts and bundling strategies.

- **Regional Strategy**

Invest in high-sales, high-profit districts for expansion opportunities.

Monitor low-performing districts and adapt strategies to improve profitability.

Conclusion

Conclusion

- Sales are primarily concentrated in specific districts and store types, showing clear areas for strategic investment.
- High-value customers share common demographic traits, enabling focused marketing and better customer retention strategies.
- Low-cost products drive volume, while high-margin products sustain profitability — both need to be managed strategically.
- By optimizing store operations, customer segmentation, and product pricing, the company can achieve sustainable growth and higher profitability.
